I am a highly motivated and detail-oriented software developer with experience in Ruby on Rails, Ruby, CI/CD and TDD. I have experience in working collaboratively in a remote environment. I am passionate about staying updated with emerging technologies and continuously improving skills through ongoing learning.

Ruby on Rails Experience

- Built and deployed multiple Ruby on Rails backend applications using PostgreSQL, AWS and GCP.
- Applied TDD with RSpec to ensure high test coverage and maintainable code.
- Integrated CI/CD pipelines using GitHub Actions and CircelCI.
- Implemented SOLID principles and utilized debugging tools like Honeybadger.
- Contributed to open-source Ruby projects and authored technical content on Rails development.

Technical Skills

- Languages: Ruby (Advanced), Java (Intermediate), Python (Intermediate), Swift (Beginner)
- Frameworks & Tools: Ruby on Rails, RSpec, CircleCI, GiHub Actions, Postgres, AWS, GCP, Honeybadger, Git
- Practices: Test-Driven Development (TDD), Continuous Integration/Deployment (CI/CD), SOLID

Featured Projects

- **Rumblr (Rails 7 App) -** Developed a full-sack application practicing TDD, Git rebasing, writing system tests, writing unit tests, Continuous Integration and Continuous Deployment. See the source on GitHub
- **Rails Technical blog -** Authored articles on Rails CI setup, deployment, and RSpec testing.
- **Scarpe (Open Source Ruby Project)** - This is the Pull Request that I contributed. This is an open-source ruby project for writing webview apps.

Experience

Ruby On Rails Engineer Mentee **thoughtbot** **2022–2025**
thoughtbot mentorship program Remote

- Mentorship and pairing sessions with Rob Whittaker, Director of Software Development in Europe, the Middle East and Africa.
- Applied TDD to write clean, efficient code, resulting in fewer bugs and more reliable software.
- Integrated SOLID principles into code design, thus enhancing code maintainability.
- Used RSpec to create comprehensive test suites, thus improving code coverage and improving software quality.
- Executed Git rebasing to maintain a clean and linear Git project history, thus facilitating easier collaboration.
- Set up Continuous Integration (CI) and Continuous Deployment (CD) using Github actions and CircleCI, thus enabling faster feedback loops, early bug detection and consistent delivery of updates.
- Implemented Honeybadger for real-time bug detection and reporting, thus improving error tracking and reducing resolution times.
- Retrospectives, planning and code reviews to get unblocked and deliver timely updates.

Quality Assurance Engineer **CourieMate** **2019–Present**
Quality Assurance Team Kampala, Uganda

- Designed and executed comprehensive test plans, ensuring system reliability and functionality. This resulted in a 95% reduction in critical bugs before deployment to production.
- Authored clear and concise system end-user manuals. This streamlined system usability and enhanced user satisfaction for both technical and non-technical stakeholders.
- Successfully trained a team of 10 operators and 10 drivers on the Delivery Management System and the Android driver app. This improved operational efficiency and reduced onboarding time by 40%
- Efficiently used JIRA to create and track issues, ensuring timely resolution and enhancing project workflow.
- Successfully configured and deployed Magento on a remote server, enabling robust and scalable e-commerce operations.
- Acted as a crucial link between remote engineering and local operations teams, facilitating effective communication and streamlined processes.
- Performed comprehensive systems analysis, ensuring the system met user requirements and improved user satisfaction.

Quality Assurance Engineer **HomePetVet** **2021–2022**
Quality assurance team Remote

- Created comprehensive test plans that ensured thorough coverage of all functionalities, which led to a significant reduction in post-release defects.
- Conducted extensive testing on the HomePetVet Web application, which led to a seamless and user-friendly experience that increased user satisfaction by 20%.
- Performed rigorous testing on the HomePetVet Mobile application, which enhanced app stability and reduced crash rates by 15%.
- Successfully executed detailed test cases and analyzed results, identifying critical issues and ensuring timely resolution.
- Identified, reported, and documented bugs within the apps, contributing to a 30% improvement in overall app quality and performance.
- Carried out thorough post-release testing to validate new features and ensure a smooth user experience, leading to a higher user retention rate.

Backend Developer **HomePetVet** **2020–2021**
Engineering team Remote

- Created a robust Rails backend application, improving system performance and scalability.
- Conducted thorough testing of the PostgreSQL database for the Rails backend app, enhancing data integrity and reliability.
- Built efficient RESTful API endpoints in Rails, facilitating seamless data operations and improving response times by 25%.
- Successfully deployed the Rails backend app to GCP, ensuring high availability and scalability of the application.
- Implemented deployment of the Rails backend app to AWS, achieving increased redundancy and load balancing for better performance.

Freelance Engineer **Self-Employed** **2017–2020**
Engineering team Kampala, Uganda

- Designed and developed the responsive NMSP website, which helped enhance user experience and accessibility.
- Designed, developed and launched the Imara Daima Android app which helped to increase user participation by 20%.
- Developed the Imara Daima web app which boosted user engagement by 20%.
- Created scalable REST APIs for the Imara Daima app which assisted in onboarding users to utilise the services of the app thus increasing user satisfaction.
- Designed and developed the Garagi android app which made car valuation services available to users.

Backend Developer **Skyline SMS Limited** **2015–2016**
Engineering Kampala, Uganda

- Created robust Rails backend applications, improving system performance and scalability.
- Conducted thorough testing of the PostgreSQL database for the Rails backend apps, enhancing data integrity and reliability.

Education and Certifications

- **B.Sc. Computer Engineering,** Makerere University, Kampala **2011–2015**
- **Programming For Data Science with Python,** Udacity **2021–2021**

Interests

- I enjoy practising and playing the guitar
- I enjoy learning languages; currently learning German
